

# Hands-free Speakers

Hosiden Besson has designed and manufactured a complete range of hands-free speakers used by Original Equipment Manufacturers (OEM).

Commercial equivalents for speakers used in many OEM applications are now available in smaller quantities with terminations to meet most requirements. The speaker shapes are the traditional and bow-front that are used by OEM's when offering hands-free capability.

Hosiden Besson continues to design and develop this type of product for volume production utilising our in-house capabilities and acoustic expertise.

- Ericsson, Kyocera, Motorola, Nokia, and Siemens types available (plus others)

- Bow-front, and traditional models

- Full design and development facility

- Various cables and terminations available

# Hands-free Speakers

## product data sheet

Commercial equivalents of the above hands-free speakers can be supplied in low quantities and other types can be matched to customer samples as required.

Hosiden Besson continues to design and develop this type of product for volume production utilising our in-house capabilities and acoustic expertise.

Hosiden Besson also offers a complete design-to-manufacture service of speakers to customers' specific needs. Please contact us to discuss your requirements.
